

SUSTAINABILITY

At Goodwill Industries of Tennessee Area, Inc. (GITA),
sustainability is one of our 13 core values:

“We believe in zero waste and being planet friendly through living the 4Rs – Reduce, Reuse, Recycle, and Repurpose.”

In 2022, we kept over 10 million pounds of people’s used items out of local landfills!

Discover how we make a difference through our sustainable practices and community-focused initiatives.

RECYCLE / REDUCE / REUSE / REPURPOSE

GITA is a champion of the circular economy. We collect gently used items and provide them with a second life. By donating and shopping with us, you help reduce waste and minimize the environmental footprint.

ECO-FRIENDLY PARTNERSHIPS

We're committed to sustainable practices that benefit the communities we serve. From recycling cardboard to diverting textile waste from landfills, we are continuously evaluating our processes to make a positive impact on our environment.

ELECTRONICS RECYCLING

We responsibly recycle electronic waste, preventing harmful materials from contaminating the environment and promoting the reuse of valuable resources.

JOB CREATION AND COMMUNITY SUPPORT

We invest in the communities we serve. Our employment services empower hundreds of individuals each year. By providing job opportunities, we promote economic sustainability and make a lasting impact on individuals and families.

GET INVOLVED TODAY!

DONATE | Clear your clutter & make a difference.
Your donations support our sustainability efforts.

SHOP | Find unique treasures at affordable prices
while reducing your carbon footprint.
